

# **GREENWICH OFFICE♦PARK**

## **Light Bulb, Ballast, Battery, and E-Waste Recycling Protocols**

Per Connecticut State Law, all fluorescent light bulbs, ballasts, batteries, and electronic waste must be recycled. There is a nominal monetary cost associated with recycling these objects, but due to the presence of mercury and other harmful chemicals in this type of waste, the cost to the environment is much greater should they be thrown away.

There are a number of economical options from which Tenants can choose in order to recycle bulbs, ballasts, batteries, and E-waste properly. The Management Office is happy to answer any questions and assist in the proper recycling of these items.

### **Recycling Options:**

#### **1. Recycling Through Greenwich Office Park**

##### *Fluorescent Light Bulbs:*

The maintenance staff will recycle the used bulbs when the staff is making the replacements. Tenants will be charged for the recycling of each bulb at the current rate of recycling. The cost will be added to the work order.

##### *Ballasts:*

Any ballast replaced by the maintenance staff will be recycled. The cost of recycling will be charged to the work order.

##### *Batteries:*

Batteries will be accepted by the GOP staff for recycling. Batteries will only be collected as part of an existing work order. If not part of an existing request, Tenants will be charged for a minimum hour's work in addition to the cost of recycling for the batteries.

## 2. Tenant Recycling

### Electronic Waste

Electronic waste includes computers, monitors, televisions, hard drives, fax machines, cell phones, and more. For your convenience, some E-waste recycling options are listed below:

#### ***NLR***

Tenants may contact NLR,Inc to arrange for recycling of E-waste. For pricing and services, please contact NLR,INC at 860-209-4599.
